LED NEON

The flexible LED Neon is an innovative material which substitutes completely the old-traditional glass neon and the luminescent lights.

The advantages of the LED Neon are:

- low energy consumption
- brightness and clear vision of the spectrum of the color
- a long lighting life
- abstinence of sound
- low weight
- flexibility during installation
- endurance of all meteorological conditions

Technical characteristics:

The LED Neon needs an electricity of 12 VDC - required electrical consumption which is provided by the led driver with appropriate parameters, which is given according to its power. The nominal power of the proposed lighting neon is 12W for 1 meter and with luminous flux of 3160 lumens, which are necessary for 1 meter of LED Neon.
